

Higgs Network Introduction of Cooperative Games

FOREWORD

Higgs Network layouts blockchain game fields in the early stage in China, through the game asset Exchange which calls GAEX to has a lot of game quality blockchain game resources. Higgs Network cooperates with multiple public chain and has positive feedback from the ecosystem of the public chain, The examples of cooperation:

Top 10 Blockchain Game In China, 2018

Top 10 Blockchain Game In China, 2018

Top 10 Blockchain Game In China, 2018

Top 10 Blockchain Game In China, 2018

Top 10 Blockchain Game In China, 2018

First multi-player strategic war game

Case for the Cooperation

NAME: TRONRAIDER

ADDRESS: <http://tronraider.io>

RELATIONSHIP: Investment of Higgs Network

PUBLIC CHAIN: TRON

DATA: Top 5 of trading volume and the number of trading

NAME: FISHCHAIN

ADDRESS: <http://fishchain.io>

RELATIONSHIP: strategic partnership

PUBLIC CHAIN: Ethereum

DATA:

A popular blockchain game, the top 10 popular blockchain game in China, the daily active users about 1,000. FISHCHAIN has a long-term effective game token model with ELA, WICC, ACT and etc., and still in the steady development.

合作游戏案例

NAME: NEOWORLD
ADDRESS: <http://neoworld.io>
RELATIONSHIP: strategic partnership
PUBLIC CHAIN: Ethereum
DATA:

A famous blockchain game, the top 10 popular blockchain game in China, the daily active users about 10,000. NEOWORLD has an active and influence community.

合作游戏案例

NAME: NEOLAND

ADDRESS: <https://neoland.neoworld.io>

RELATIONSHIP: Higgs Network offers technology supports and operation.

PUBLIC CHAIN: NEO

DATA: The daily active users about 758 during 16th Mar- 31st Mar. The grand total of deposits are 25,000NEO, recently, Higgs Network helps data moves on blockchain of NEOLAND

ZILLAND的介绍

基于NeoWorld的虚拟世界引擎和ZIL的区块链技术，ZILLAND是NeoWorld世界中一块全新的大陆，以ZIL为主要货币，ZIL社区用户实现高度自治，是NeoWorld世界的经济特区。

- **以ZIL为货币进行土地拍卖**
从5月1日起，ZILLAND将开始第一片土地的拍卖，用户以ZIL为货币进行竞拍，土地的拥有者可以建造个性各色的建筑，打造自己的理想王国！
- **以ZIL为货币进行建设和收益分配**
ZIL将成为ZILLAND的基础货币，用户使用ZIL进行建筑、收益分配、交易等多种商业功能，用户还可以成立工会和企业等各种形式的组织，通过协作实现更大的价值，让经济更丰富多彩。
- **基于Scilla的通证设计，实现社区治理**
基于ZIL的区块链技术，ZILLAND将发行代表ZILLAND权益的通证，既可以用于投票，决定社区治理方向，又可以分享社区经济红利！

ZILLAND核心玩法

相对于传统沙盘世界，ZILLAND在保证游戏性的前提下，降低了生存与建造的门槛和复杂度，更加侧重于经营乐趣和社交乐趣。更重要的是，为不同类型的玩家都提供了创造价值、赚取财富的可能性。

<p>建造与经营</p> <p>用户购买或竞拍土地，然后建造设施，通过布局和投资，土地可以持续带来收益；而吸引其他用户来工作，则能获得更大回报；土地的一系列经营指标的发展，还会影响到竞选、奇迹等特殊事件。</p>	<p>采集与工作</p> <p>无论是否拥有土地，都可以在ZILLAND世界中自由探索。旅程中，用户可以在前置上采集材料，并用于协助建造，获得报酬。用户也可以在各种建筑中打工，不同类型的工作会要求对应不同技能。</p>	<p>协作与销售</p> <p>在白银时代，用户可以通过一系列内置工具创作装饰、建筑、音乐等素材，然后并在销售！用户也可以通过设计炫酷的场景、趣味的游戏、组织派对，来吸引流量，出售广告获利，一切皆有可能！</p>
<p>角色与交通</p> <p>ZILLAND是一个仿真的世界，用户在ZILLAND中拥有自己的3D形象，这是在虚拟世界中的化身。ZILLAND和真实世界一样有距离的概念，用户不但可以行走，还可以通过私人、公共交通来旅行。</p>	<p>大陆与自治</p> <p>ZILLAND虚拟世界由若干个大陆组成。大陆在领主和理事会的治理下，按照不同的经济规则，促进繁荣，发展居民人口，和其他大陆竞争。大陆之间的贸易规则也是由理事会制定。</p>	<p>UGC与创作</p> <p>ZILLAND的用户可以设计任何内容，比如，设计一个剧场，雇佣演员表演脱口秀，然后收取门票。用户递交素材给社区，审核通过的前提下，运营商会有的把这些素材增加到虚拟世界内。</p>

Introduction of Higgs Network

希格斯网络是一家为区块链游戏服务的基础设施提供商

Higgs Network provides service for the blockchain games:

- ◆ management on crypto wallet
- ◆ The fastest exchange and liquidity
- ◆ Improve token model in game

Higgs Network provides service for the public chains:

- ◆ Traffic into cash
- ◆ The fastest exchange and liquidity
- ◆ Verification and popularization of technology

Higgs Network provides management service of the crypto wallet

3 key elements of a successful blockchain game:

- ◆ Art design
- ◆ Game content
- ◆ Design of token model

The blockchain technology is also an important element to success, specially in the aspect of wallet ,contract safety and the cost of operation.

- ◆ Some assets of game will be used centralized management, the safety of the crypto assets are important as same as the Exchange.
- ◆ It needs an independent node and wallet service when connect with each public chain, and also needs people to maintain and manage, the cost of copying is very high.

Higgs Network provides a standard ADF or API, the blockchain games launch with Higgs Network at the same time also achieve fundamentally interconnected with public chain assets.

Higgs Networks' managent service of crypto wallet based on the technology on blockchain, this technology has mature frame and also protect by multiple safety of Knownsec, those could make sure the blockchain game asset are very safe.

The blockchain game connect with Higgs Networks could save abundant operation costs and server fee, and also help games focus on the game development and create game contents.

Game partnerships:

FishChain NEOWORLD

NEOFISH NEOLAND

Cryptowar Horse Saga

CardMaker ImperialThrone

Higgs Network provides a faster exchange and liquidity service for the blockchain games

The right based on the game asset, the blockchain game includes 2 important field:

- ◆ Game field
- ◆ Finance field

Finance field is strange for the most develop teams of the blockchain, in a normal operation economic system, the games liquidity is a barrier for game token developing.

- ◆ The first considerable thing is the trade speed for the blockchain game users
- ◆ The trade volume is the subordinate element for the users, because for the invest users, the price sensitivity is lower when compare with the common users.

Higgs Network provides a faster exchange and liquidity service for the blockchain games, and also provides an extended digital assets exchange network, this network includes a faster exchange and liquidity service.

Base on Bancor calculation, the reserve token of Higgs Network provides a faster exchange and liquidity service for all blockchain games, which could be charged.

Higgs Network provides improving service of game token model for the blockchain games

The blockchain game industry just rises, the most practitioners come from the game industry, when consider about the token model there is no mature experience to use for reference.

2 differences between the traditional game and the blockchain game:

- ◆ Freedom of assets interaction
- ◆ The numerical limitation on the inflation mechanism

numerical design of traditional games are not suitable for the blockchain games' token model, maybe a small weakness will bring shutdown of the whole economic system.

Higgs Network participated in designing the game token model of multiple famous blockchain games and has a completed methodology on blockchain games. Higgs Network could like to share with game developers and also could like to provide improving service of game token model for the blockchain games

双螺旋结构经济模型
(单一通证, 基于NFT与FT)

混合通证经济模型

宏观调控模型
(应对通胀及通缩)

Games need a mature game token model to live longer, Higgs Network could provide a faster exchange and liquidity service, that brings a long term stable development of games.

Higgs Network will provide the plans of traffic for the public chains

Higgs Network will provide the plans of traffic for the public chains, that based on the experience of overseas game publisher. Through the cooperate with Facebook, Google and others, Higgs Network will turn the traditional game players into a blockchain members and token holders. Monitoring the popularization costs and the operation of the token model, that make sure the transform process is high efficient with the lower cost.

Higgs Network provides a faster exchange and liquidity service for the blockchain projects

Higgs Network will provide a faster exchange and liquidity network for the blockchain projects. In this network, The investment type users will become a token providers, which achieve value flow and circulation inside of the blockchain games.

The holder type users will provide a faster exchange and liquidity service for the user type users, that has revenue of handling fee, this is a core model of the Higgs Network.

Higgs Network will provide the verification and popularization of technology for the blockchain projects

In order to ensure the users experience, the most blockchain developers will give up the whole games on the blockchain, instead of using centralized IOU to record data, at the same times, the unstable performance of some public chains, that is also an important barrier of the pure blockchain game development.

Asynchronous transaction and transaction backups mechanism are helped Higgs Networks achieves game data, logical processing and assets process on the blockchain which without has any influences on game experience. This process is used by recording, that cannot has any influences on the game results. It' s also could explore the limitation of the public chains at the same time, and also prepares for launching the business in the future.
